

Innovative Plastics Available from TSUBAKI & MAXTON

The Tsubakimoto Chain Group combined its world class experience in the chain manufacturing with innovations in plastic to create the perfect line-up of plastic chains. Tsubakimoto Chain Co. and Tsubaki Yamakyu Chain Co. considered the problems that most chain users encounter, and remedied them by developing new products and specifications to combat each problem individually.

Your problem

- Unstable conveying due to poor sliding
- Excessive line pressure
- Toppling bottles
- Short wear life
- High running cost
- Expensive lubricant

Our solution

Ultra Low Friction Series (UMW/US series)

Your problem

- Damage by hot water and high temperature
- Damage by sterilizing
- Wear from high speed conveying

Our solution

Heat Resistant/ High Speed Series (KV/HR series)

Your problem

- High disposal cost for used chains
- High running cost
- Short wear life

Our solution

PLASTIC PINS

Your problem

- Corrosion in acid and alkaline environment

Our solution

Chemical Resistant Series (SY/Y/CR series)

Your problem

- Bacteria and mould in humid areas
- Short wear life

Our solution

Anti-bacterial/ Anti-mould Series (MWS/AB series)

Your problem

- Product contamination
- Pieces of broken chain

Our solution

Impact Resistant Series (DIA/DIY series)
