

At Tsubaki, we design and manufacture the forestry chain we sell. Which means we have complete control from start to finish. Not everyone can say that. Based on this strict adherence to quality control standards we present

the latest innovation in sharp top chains. Tsubaki sharp top chains featuring patented lube groove bushings. Tsubaki brand sharp top chains are the result of superior manufacturing techniques, materials and our dedication to manufacturing products of the highest quality for the forestry industry. Because here at Tsubaki, we don't just bring you close to a century of experience, we bring you the Tsubaki Advantage: a full line of premium quality engineered forestry products, which includes chain, sprockets, and bushings. Forestry products that don't just perform, they outperform the competition. All the while saving you money. For information on how you can lower your costs and increase productivity with Tsubaki forestry products,

call us at 800-263-7088.

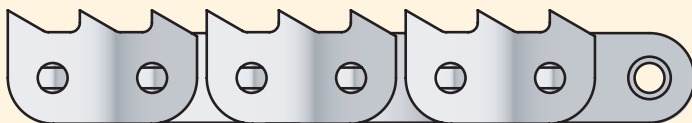

With a history deeply rooted in quality, we present our latest innovation: sharp top chain.

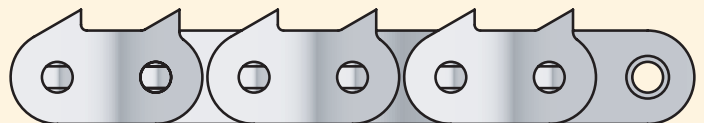

Driving your business.

Tsubaki now offers the most popular sharp top chain sizes and profiles.

RF32B STICKER

- Sizes RF80, RF100 and RF120 feature patented oil groove bushings that act as a reservoir to trap excess lubricant, minimizing pin/bushing wear, and extending chain life.
- Styles for use on high-speed edgers receive special heat treatment on side plates, helping to prevent wear fatigue cracking.
- All sharp top chains feature straight sidebars.
- Some styles are available in multi-strand configurations.
- Bottom grinding of the side plates is available upon request.
- All sharp top chains can be cut to length to suit your application.
